

010048

1 According to the Nuclear Regulatory Commission (NRC) DOE must have a final site design for the license application. The site recommendation is more important than the license application, because it is what the President will use to decide whether or not to recommend Yucca Mountain to Congress. The Final Environmental Impact Statement (EIS) must be as clear as the NRC license application, and must indicate a final design choice. This supplement does nothing to achieve that.
